

# DJ GRILL

## Tech Rider

DJ GRILL performs DJ sets using Rekordbox-prepared USBs or a personal controller rig, depending on venue setup. The workflow is designed for reliability, club compatibility, and fast changeovers.

### PERFORMANCE FORMAT

DJ GRILL performs dynamic, groove-driven DJ sets using Rekordbox-prepared USBs or a personal controller rig, depending on venue setup.

The workflow is designed for reliability, club compatibility, and fast changeovers.

### PREFERRED SETUP (CLUB STANDARD)

Any of the following configurations are ideal:

- 2 × Pioneer CDJ-3000x, CDJ-3000, or CDJ-2000 NXS / NXS2 media players
- 1 × Pioneer DJM-A9, DJM-A10, or DJM-900 NXS2 mixer
- 2 × Booth monitors, left + right with independent level control
- LAN-linked players for track data and sync
- Clean, grounded power and sturdy booth table ("H 4 ft wide × 3 ft high)

Up-to-date firmware and well-maintained hardware preferred.

### ACCEPTABLE ALTERNATE CONFIGURATIONS

DJ GRILL is comfortable adapting to alternate setups given notice.

All-in-One / Compact Units:

- Pioneer XDJ-XZ • XDJ-RX3 • XDJ-RR • XDJ-AZ or equivalent

Legacy Club Rigs:

- CDJ-2000 / 2000 NXS + DJM-900 NXS (any combination)
- Denon SC-6000 + X1850 (may require USB prep adjustment)

Rekordbox-formatted USBs can be used on any modern Pioneer setup.

### ARTIST-SUPPLIED SETUP (ON REQUEST)

When in-house gear is unavailable, DJ GRILL can provide a personal rig:

- Pioneer DDJ-FLX10 controller + laptop (Rekordbox Performance Mode)

Venue must provide:

- 1 × stereo line input (RCA or XLR) to house mixer
- 1 × 120 V power outlet within 3 ft of booth
- Stable, flat surface (min. 4 ft wide × 3 ft high)

### VISUAL SUPPORT / VJ CAPABILITY

DJ GRILL can provide synchronized visual content for compatible setups.

- Standard output: 1080p (1920 × 1080)
- Other resolutions available upon advanced notice
- Delivered via HDMI, SDI, or USB-C interface depending on system

Please confirm venue projection input type and resolution if requesting visuals.

## **BOOTH & AUDIO NOTES**

- Booth monitors should be placed on both sides of the DJ, and are optional if given prior notice
- Balanced XLR output preferred
- Setup / teardown "H 10 minutes (USB/CDJ only) and "H 30 minutes if bringing controller setup
- DJ GRILL travels with personal headphones + USB backups

## **SET LENGTH & FLEXIBILITY**

- Typical set: 60 – 120 minutes
- Extended sets: 5+ hours possible by arrangement

## **GENERAL INFO**

- Base: Seattle, WA
- Travel: Available for regional + international bookings
- No special FX or lighting coordination required unless arranged
